TECHNICAL SKILLS

Programming & Development

C# & .NET Framework: Proficient in developing applications using C# and the ASP.NET framework.

Python: Foundational knowledge of Python for scripting and basic application development.

Web Development: Experience building and maintaining web applications with ASP.NET.

Content Management Systems (CMS): Practical experience in site management and content administration using Joomla.

Networking & Infrastructure

Network Fundamentals: Solid understanding of core networking concepts, backed by CCNA-level knowledge (TCP/IP, Subnetting, OSI Model).

Hardware & Deployment: Experienced in physical hardware setup, deployment, and troubleshooting of workstations and network devices.

Cabling & Infrastructure: Practical skills in network cabling, trunking, and physical infrastructure implementation.

Database Management

Database Systems: Hands-on experience with Microsoft SQL Server and MySQL.

Database Skills: Proficient in writing queries, managing data, and performing basic database administration tasks.

System Administration

Windows Server Environment: Foundational knowledge of Active Directory and experience managing Windows Server 2019.

Server Management: Practical experience in configuring shared folders and hosting web applications locally via IIS (Internet Information Services).

Web & Design Tools

Design & Prototyping: Skilled in creating visual content and prototypes using Canva.

PROJECTS

SIDOLHUB | Full-Stack Web Application

Developed a centralized learner management portal using ASP.NET and C#. The application streamlined learner registration, class enrollment, and report generation, supported by a SQL Server database and hosted on IIS. Key features included robust search, detailed learner profiles, and dynamic class management.
